## Outsourced Safety Program

An effective safety program is about so much more than compliance.

#### A Strong Safety Culture Leads to a Safer Environment, Less Risk, and Lower Premiums

But a comprehensive and effective safety program is difficult for a single person or small team to achieve. By outsourcing your safety program you get a depth of experience and expertise, and breadth of productivity for all aspects of your program at a fraction of the cost.

There is expertise when it comes to training, documentation, inspections and working with your insurance company. With our team approach, each area of your safety program is completed by an expert, and managed by a single primary contact.

#### Major benefits include:

**Reduced Cost** 

Service Scalability

Lower Risk

**Greater Expertise** 

Safer Workplace

#### Tiered Safety Programs

Our tiered programs are configured to your safety needs and can be scaled up or down throughout the year. We will create and maintain a safety program that is more cost-effective than hiring in-house, and deliverables will be on-time and within budget. It makes it easy to control costs without sacrificing quality or risk. All safety program tiers include the following:

- » Work with managers to help create safety culture
- » Maintain safety documentation file
- » Maintain OSHA 300 logs

- » Oversee accident investigation
- » Coordinate safety activities

#### Responsibilities & Deliverables

Want to know which tier will work best for you? Review our responsibilities and deliverables comparison chart (page 2).
