

DIY Training Kits

Complete Safety Training Courses
Packaged for Convenience & Flexibility

Meet OSHA Safety Training Requirements

Our DIY Training Kits are a convenient and cost-effective training solution, perfect for in-house safety coordinators. Flexible for group training either in a classroom setting or out on the jobsite, the "Train-the-trainer" style kits include everything needed to conduct OSHA compliant safety training for general awareness. Each course explores the topic thoroughly, leaving employees with detailed knowledge, a certificate and wallet card upon successful completion.

All Training Kits Include:

- » Software-based training program
- » Instructor course materials
- » Student course materials
- » Program outline and instructions
- » Quizzes and evaluations
- » Training logs and sign-in forms

Why Choose DIY Training Kits?

- ✓ Convenient and cost effective
- ✓ 100% OSHA compliant
- ✓ Train employees in just 1 hour
- ✓ Train and re-train at no extra cost
- ✓ Easily reproduce course materials

All DIY Training Kits are produced in US English with select kits available in Spanish. Course content is written for US based OSHA compliance, with some topics also meeting Canadian OH&S regulations.

Safety Services had us well taken care of from the beginning

"Safety Services' timely distribution of training materials were initially tracked with scrutiny for several months, before realizing that the team there had us well taken care of from the very beginning."

- Associated Builders and Contractors
