

# Safety Manuals

Custom-built, and uniquely tailored to your workplace hazards.

Safety documentation might seem one-size-fits-all. But every work site has their own unique hazards, and every state, and every industry has their own regulations. Depending on your safety initiatives and location, you may need different manuals.

We offer five different manuals needed to maintain your safety compliance and meet regulations. Branded for your company, we'll advise you on which manuals are needed for your business and industry. And for those organizations that need custom content like site maps, research, or procedural documentation, our EHS technical team is happy to accommodate.

**IIPP manuals are covered by our 1-Year Policy Change Guarantee. If OSHA makes any policy changes within one year of your order, we'll update those chapters for FREE.**

## All Safety Manuals Feature:

-  100% turn-key solution for safety policy documentation.
-  Custom-branded with your company name, logo, and contact information.
-  Meets Federal and State (OSHA), or Provincial (OH&S) requirements.
-  Manuals delivered as both digital (PDF) and hard-copy (professional printing and binder).

## Which Safety Manuals do you Need?

Safety Manual	Who Needs It?
Injury & Illness Prevention Program (IIPP)	All companies with at least 1 employee
Health, Safety & Environmental (HSE)	Companies that must submit through a prequalification platform
Drug Free Workplace Program (DFWP)	Companies that need to meet the DFWP requirement
PHMSA	Companies working in DOT or on pipeline projects
Quality Management Systems (QMS)	Companies that must comply with ISO 9001 for international trade
