

# OSHA Approved Safety Training and Certification at your Doorstep

Instructor-led, On-site Training for When you Require It

## The right level of training, when and where you need it

When it comes to equipment operator certifications, competent-person training, and other certified training programs, you want the convenience of being on your own turf and the flexibility to minimize downtime.

With our on-site service, OSHA authorized instructors deliver in-person safety awareness training, operator certification, industry-specialized certifications, and/or competent education training to your employees. Customized for your business and unique workplace hazards, these training programs are designed to incorporate your equipment and environment.

## On-site Training Advantages Include:

Convenience of your workplace/location

Train on your own equipment

Encourage Better Participation

Promote a Safety Culture

Hand-on Courses for Instant Feedback

Meet OSHA In-person Standards

Quicker Completion

Integrated English & Spanish Instruction

## Training and Certification Programs

TRAINING PROGRAM	WHO NEEDS IT?
Awareness Level	All employees who will be working around the specified hazard/s
Operator Certification	Anyone who will be operating equipment such as forklifts, boom lifts and other MEWPs
Other Certifications	Based on industry and regulatory requirements. Examples are OSHA 10/30 and CPR/First Aid
Competent Education	Employees needing to identify hazards. Often required by GC's in plumbing, roofing and HVAC

## Awareness Level Training [CLASS]

This includes more than 30 awareness level courses, such as PPE, Safety Orientation, Hazard Communications, and Slips Trips and Falls. Other popular awareness training topics include:

- ✓ **Confined Spaces**
- ✓ **Fall Protection**
- ✓ **Bloodborne Pathogens**
- ✓ **Machine Guarding**
- ✓ **Crystalline Silica**
- ✓ **Ladder Safety**
- ✓ **Fire Safety**
- ✓ **Heat Illness**
- ✓ **Electrical Safety**

## Operator Certifications

[CLASS + TEST + PRACTICAL]

Operator Certification is specific to a piece of equipment – awareness, hazards, and how to safely operate. Train and learn on your own equipment. A hands-on practical test is required for certification. Popular courses include:

- ✓ **Forklifts**
- ✓ **Scissor Lifts (MEWP)**
- ✓ **Boom Lifts (MEWP)**

## Other Certifications

[CLASS + TEST + PRACTICAL]

Specific to industry requirements, state, and federal regulations. Popular courses include:

- ✓ **OSHA 10 & 30**
- ✓ **CPR / First Aid / AED**

## Competent Education

[CLASS + TEST + PRACTICAL]

Competent Education Trainings are pass/fail courses based on specific industry hazards. Including both written and practical examinations, popular courses include:

- ✓ **Confined Spaces**
- ✓ **Fall Protection**
- ✓ **Ladder Safety**
- ✓ **Crystalline Silica**
- ✓ **Arc Flash (NFPA 70E)**
- ✓ **Scaffolding**
